ABOUT US

Brunskill Design is an architecture and design company with experience in residential, transport and commercial building projects. Our work experience and capability ranges from small scale design of interior elements to masterplanning multi hectare sites. You can trust us to offer a committed service to your project, large or small.

Situated in St Albans, Hertfordshire, with easy access to London and a second base in the South West, near Bath - we consider taking on projects in all areas.

OUR TEAM

We are a small team of design orientated professionals with big (and small) ideas. We hope to continue to grow, but not too much.

Helen Brunskill is the leader of the practice and is responsible for providing a good design service for our clients. She is an architect, fully RIBA qualified in 1990, and her previous experience has been in major station projects and other award winning developments. Clients include: Ove Arup Engineering, Bechtel, Capita and private householders (more detail available on request).

OUR SERVICES

ARCHITECTURE

DESIGN

ARCHITECTURE

COMMERCIAL

We provide architectural services planned to deliver your building on cost and on schedule.

TRANSPORT

We are ideal architects for rail projects in the UK, as our staff have fifteen years experience in transport infrastructure, buildings and masterplanning.

RESIDENTIAL

We design house extensions, new build or other types of residential projects.

15

COMMERCIAL

We provide architectural services planned to deliver your building on cost and on schedule. We are client focussed and will communicate with you regularly. It is important to us that your project works for you. We have years of expertise in producing design solutions and in many different building types including educational, leisure and retail.

TRANSPORT

We are ideal architects for rail projects in the UK, as our staff have fifteen years experience in transport infrastructure, buildings and masterplanning. With our network of engineering and other associates, we can tackle a wide variety of rail projects, from refitting accommodation in small stations to materplanning studies for major projects.

RESIDENTIAL

When addressing a residential project, it is paramount to understand the client's brief, and also to look at the opportunities the site gives us. We have experience both with traditional and heritage materials and with modern minimalistic design. We provide assistance in the tender process if required and can also do site checks during the works.

DESIGN

INTERIOR DESIGN

We offer an interior design service for space planning your business, redesigning your home or any other transformations.

INTEGRATED FURNITURE

Working with you, we can develop clever integrated furniture systems that maximise storage and compliment your interior.

GARDEN LAYOUT DESIGN

Bring the outside in with our ideas on garden layout design. We have experience recommending external materials and planting suggestions.

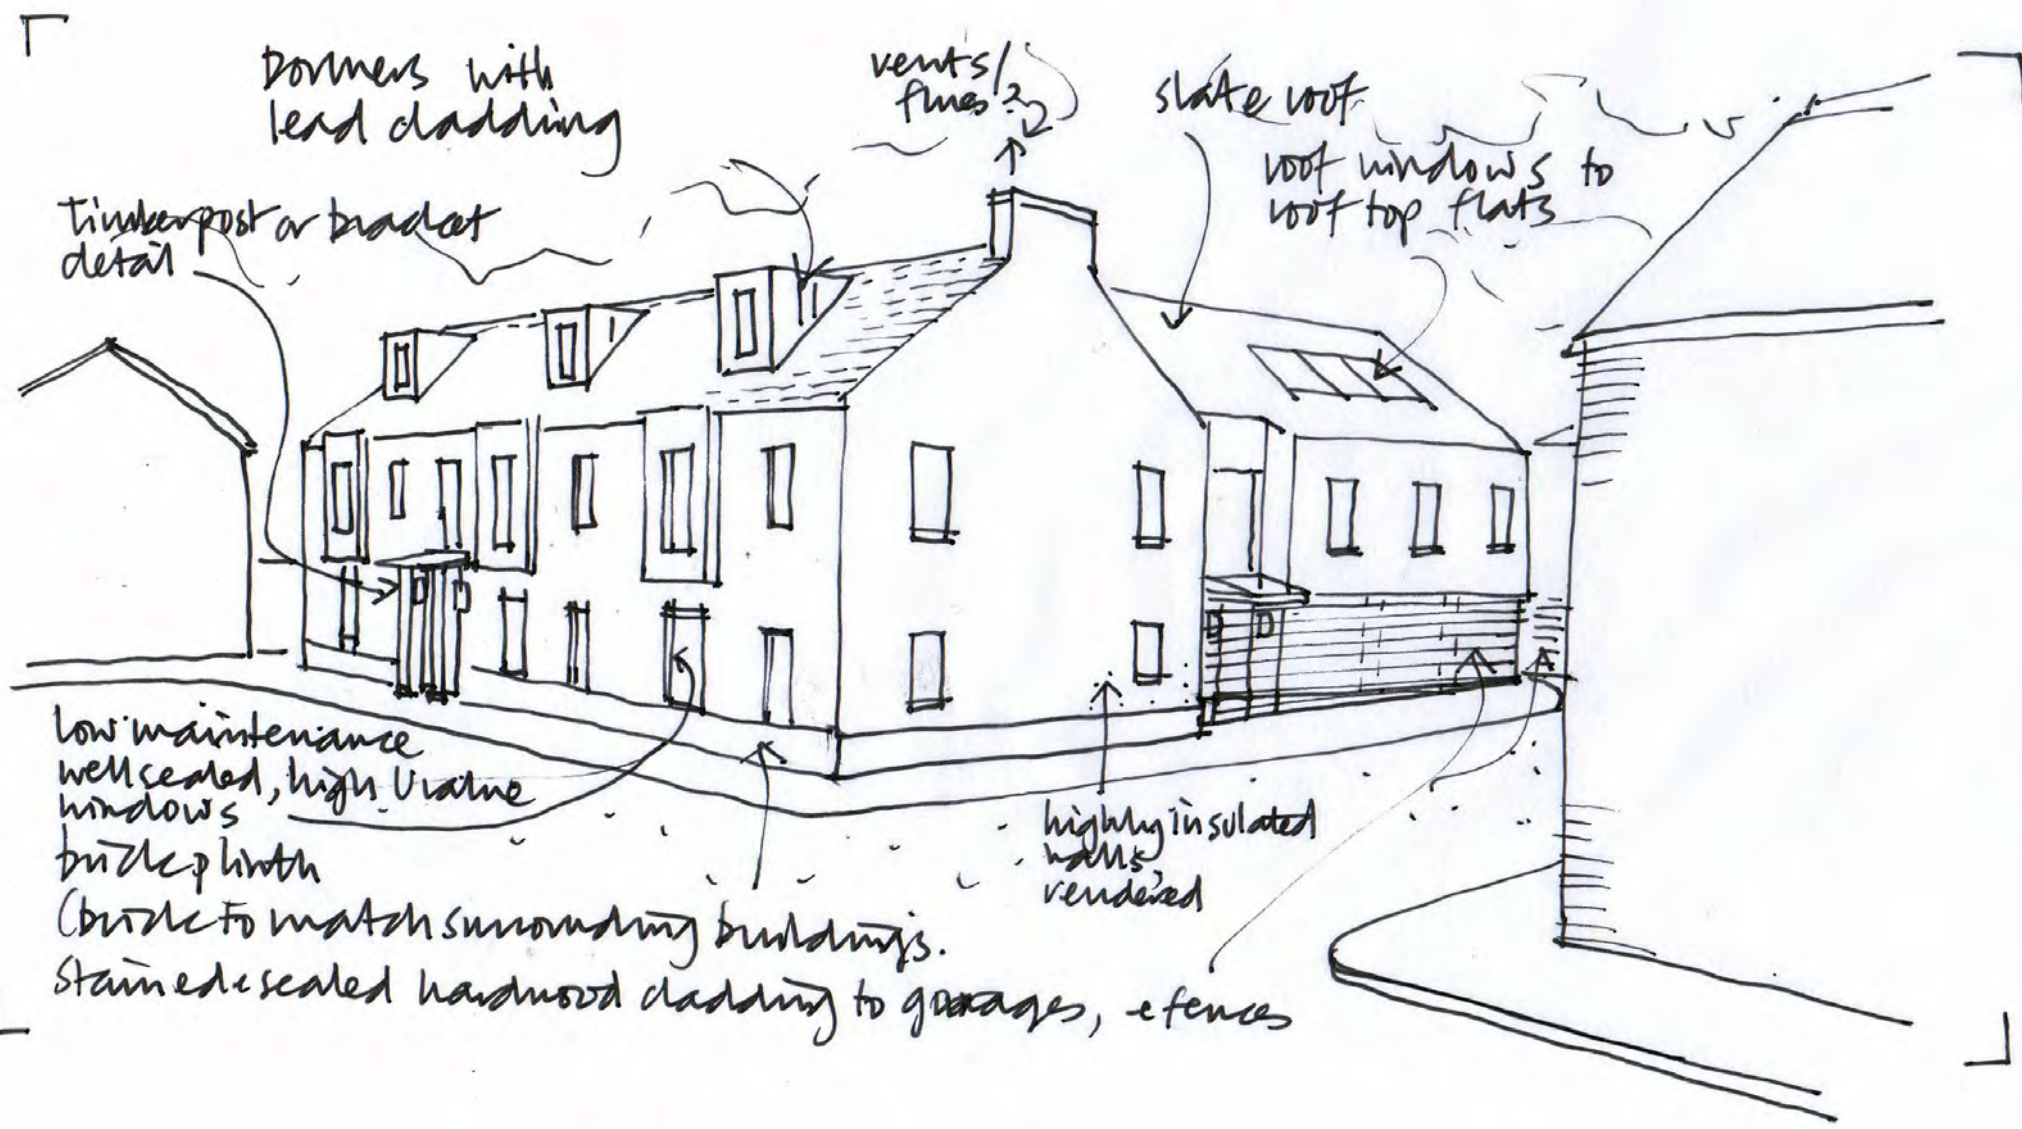

OTHER SERVICES

CONSERVATION

Our conservation work includes works to listed buildings, work in conservation areas and special settings, such as properties in the greenbelt.

- CHANGE OF USE & OTHER TYPES OF PLANNING APPLICATION
- BUILDING SURVEYS
- FEASIBILITY CONSULTATIONS

Dormers with lead cladding

vents/fines

slate roof

roof windows to roof top flats

timber post or bracket detail

low maintenance well sealed, high U value windows

brick p/ h/ wth

brick to match surrounding buildings.

stained & sealed hardwood cladding to garages, & fences

highly insulated walls rendered

CONSERVATION

If you require a listed building consent, or your site is in a conservation area or an Area of Outstanding Natural Beauty (AONB) or greenbelt, we can usually assist you with plans and negotiations. Meetings with Conservation Officers and others in the planning departments of Local Authorities are often necessary to look at what may achieve consent.

OUR PROCESS

ENGAGE

Tell us what you want and we will help you plan out your project and help make it happen, working to your brief. We take our responsibilities to our client, our team and our planet seriously. Good communication is our primary tool.

DESIGN

In discussion with our client, first develop a sketch scheme, then drawings for Planning applications and Building Regulations approvals. CAD 2D and 3D is used as well as some freehand methods and model making. We then develop details to a higher degree ready for quality construction.

BUILD

We offer tendering and services in relation to building contracts. We work closely with contractors and suppliers to minimise the issues that could cause problems on site.
